

# OneLogin SSO Integration with Optimizely

1. When you reach out to Optimizely Support requesting SSO for your Optimizely account, the Optimizely Support Engineer will provide you with the below details:

- A. IdP ID
- B. Assertion Consumer Service URL (ACS URL)
- C. Audience URI

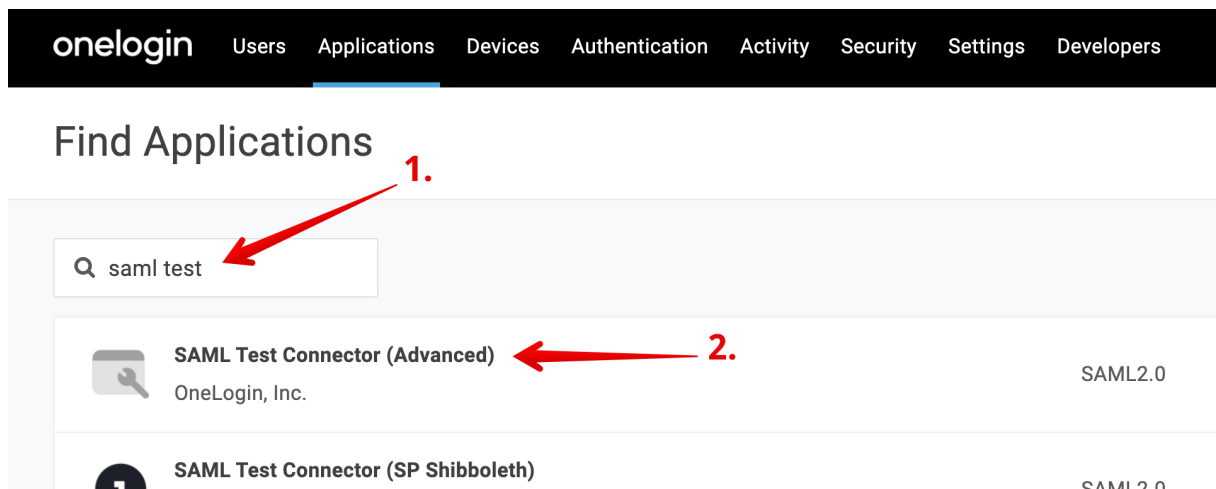

2. In your OneLogin admin dashboard, go to “**Applications**”

2. Click the “**Add App**” button

3. In the Search field, type “**saml test**” and choose “**SAML Test Connector (Advanced)**” from the results list

4. Enter the desired app name and click the **“Save”** button

SAML 2.0 Endpoint (HTTP)

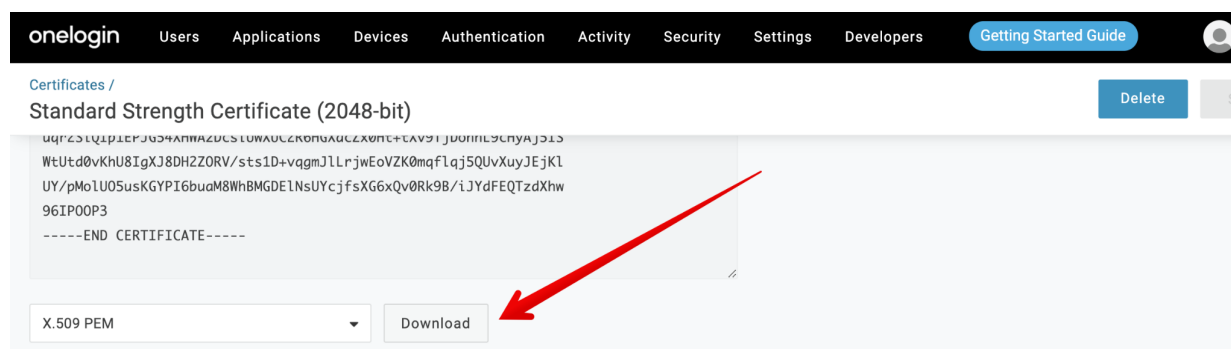

7. Copy the “**SAML 2.0 Endpoint (HTTP)**” and provide it to Optimizely Support

8. Click the **“View Details”** link in the “X.509 Certificate” section

9. Click the “**DOWNLOAD**” button and save the PEM file and provide this PEM file to Optimizely Support

11. Go to the “**Configuration**” tab and paste the “**Audience URI**” provided by Optimizely Support (from step 1) into the field “**Audience (Entity ID)**”

The screenshot shows the Okta Admin console interface. The top navigation bar includes 'onelogin', 'Users', 'Applications', 'Devices', 'Authentication', 'Activity', 'Security', 'Settings', 'Developers', and a 'Getting Started Guide' button. Below the navigation bar, the breadcrumb is 'Applications / SAML Test Connector (Advanced)'. On the left sidebar, the 'Configuration' tab is selected, indicated by a red arrow. The main content area is titled 'Application details' and contains several fields. The 'Audience (EntityID)' field is highlighted with a red arrow and contains the URL 'https://www.okta.com/saml2/service-provider/s...m'. Another red arrow points to the 'Configuration' tab in the sidebar.

12. Copy the “**Assertion Consumer Service URL**” provided by Optimizely Support (from step 1) and paste it into the fields “**Recipient**”, “**ACS (Consumer) URL Validator**” and “**ACS (Consumer) URL**”

The screenshot shows the Okta Admin console interface. The top navigation bar is the same as in the previous screenshot. The breadcrumb is 'Applications / SAML Test Connector (Advanced)'. On the left sidebar, the 'Configuration' tab is selected, indicated by a red arrow. The main content area is titled 'Application details' and contains several fields. The 'Recipient' field, 'ACS (Consumer) URL Validator\*' field, and 'ACS (Consumer) URL\*' field are all highlighted with red arrows and contain the URL 'https://optimizelyapp.okta.com/sso/saml2/0c...x7'. A red arrow also points to the 'Configuration' tab in the sidebar.

13. Still under the “**Configuration**” tab, locate the field “**Login URL**” and enter the below URL (replace the placeholder <IdP\_ID> in the URL below with the **IdP ID** provided by Optimizely Support in step 1):

`https://app.optimizely.com/start-sso?idp_id=<IdP_ID>`

The screenshot shows the Okta Admin console interface. The top navigation bar is the same as in the previous screenshots. The breadcrumb is 'Applications / SAML Test Connector (Advanced)'. On the left sidebar, the 'Configuration' tab is selected, indicated by a red arrow. The main content area is titled 'Application details' and contains several fields. The 'Login URL' field is highlighted with a red arrow and contains the URL 'https://app.optimizely.com/start-sso?idp\_id=0c...x7'. A red arrow also points to the 'Configuration' tab in the sidebar.

14. Still under the “**Configuration**” tab, locate the drop-down “**SAML initiator**” and select “**Service Provider**” and click “**Save**”

16. After all actions listed above have been performed, inform Optimizely Support that the setup on your side is complete and the Optimizely Support Engineer will proceed to arrange a short call with you to turn on the final SSO switch in your Optimizely account during the call.

The purpose of the call is to make sure that the SSO access works correctly and to reverse in case it does not, as users will not be able to login using username and password while SSO is active in your Optimizely account.
